Abstract

A concise overview of the proposed solution

PROJECT ABSTRACT

The Event Management Mobile Application for Attendee Self-Service is a web-based application designed to simplify and digitize the event participation process. Traditional event management often involves manual registration, paper tickets, long queues, and difficulty accessing event-related information. This application addresses these challenges by providing attendees with a single platform to independently manage their event activities.

The system allows users to register for events, browse event details, book tickets, access digital QR-based tickets, check in, view schedules, receive announcements, and provide feedback. An admin module enables organizers to create and manage events, monitor registrations, manage attendees, verify QR-based check-ins, and view event-related information.

The proposed system reduces manual effort, minimizes paperwork, improves check-in efficiency, and provides a convenient self-service experience for attendees.

Introduction

Making event participation simple, digital and self-service

THE IDEA

One platform for the complete attendee journey.

- ✓ Discover and search upcoming events
- ✓ Register and book tickets online
- ✓ Access a digital ticket with QR code
- ✓ View schedules, venues and announcements
- ✓ Give feedback after attending

ATTENDEE JOURNEY

Problem Statement & Objectives

The challenge and what the project aims to achieve

PROBLEM STATEMENT

- ! Manual registration and data entry
- ! Long queues during event entry
- ! Paper tickets and manual verification
- ! Scattered schedules and announcements

OBJECTIVES

- ✓ Simplify registration and booking
- ✓ Enable attendee self-service
- ✓ Speed up QR-based check-in
- ✓ Improve digital communication
- ✓ Support organizer management
- ✓ Improve overall attendee experience

Key Features

Core functionality for attendees and organizers

ATTENDEE FEATURES

- ✓ Login & registration
- ✓ Event discovery & search
- ✓ Ticket booking
- ✓ Digital QR ticket
- ✓ Schedule & venue details
- ✓ Notifications & announcements
- ✓ Booking history
- ✓ Feedback & ratings

ADMIN / ORGANIZER FEATURES

- ✓ Create & manage events
- ✓ Manage attendees
- ✓ Booking overview
- ✓ QR check-in verification
- ✓ Schedule management
- ✓ Announcements
- ✓ Feedback monitoring
- ✓ Dashboard analytics

SYSTEM ARCHITECTURE

Application Workflow

End-to-end attendee journey

DISCOVER → BOOK → VERIFY → ATTEND → ENGAGE

Future Scope

Potential enhancements for a smarter event ecosystem

- | | | |
|---|----------------------------|--|
| 1 | Online payments | Integrate secure payment gateways. |
| 2 | Push notifications | Send reminders and live updates. |
| 3 | AI recommendations | Suggest events based on attendee interests. |
| 4 | Maps integration | Provide directions and venue navigation. |
| 5 | Live event tracking | Show sessions, occupancy and real-time updates. |
| 6 | Advanced analytics | Measure registration, attendance and engagement. |

Future vision: evolve from event booking into an intelligent event experience platform.

Conclusion

A unified platform for a smoother event experience

IN SUMMARY

The Event Management Mobile Application transforms the attendee journey by combining registration, booking, digital ticketing, QR check-in, schedules, notifications and feedback in one platform.

It reduces manual effort, minimizes paperwork and gives organizers a centralized way to manage events and attendees.

KEY TAKEAWAY

**SELF-SERVICE
+
DIGITAL ACCESS
+
FASTER CHECK-
IN**
